

TEP CalMend

GENERAL INFORMATION:

TEP CalMend is produced in the Rocky Mountains of Colorado. It is an excellent source of calcium and sulfur. The granular form of TEP CalMend makes for easy and efficient application. The nutrients guaranteed in TEP CalMend have been shown to aid in soil improvement and are essential nutrients for plant growth and production.

USE DIRECTIONS:

It is recommended that a complete soil test be made to determine pH and nutrient level before applying TEP CalMend to the soil. Soil test data allows for the most efficient and effective application rate.

Suggested Application Rates (lbs/acre):

- Spot Treatment: 250-1,000
- Broadcast-Specialty Crops: 250-1,000
- Side Dress/Drilled Band: 50-200
- Broadcast-Row crops and alfalfa: 100-250

Application: The granulation of TEP CalMend allows for uniform application and easy blending. A minimum moisture is required to activate the product. For best results, spread TEP CalMend and thoroughly wet for soil incorporation.

For application rates suitable to your geographical area and soil type, please contact TEP, Inc. at (559) 871-4565.

Guaranteed by:

TEP, Inc.
10700 Road 30
Madera, CA 93637

GUARANTEED ANALYSIS:

Calcium (Ca)	11.0%
Magnesium (Mg)	1.0%
